We are more than just  
Safflower

## About STI

At Safflower Technologies International (STI) we have over 30 years of experience in safflower plant breeding, research and production experience. We also work with many other crops including: Sunflowers, Pulses, Barley, Millet, Flax and small grains.

STI contracts 50,000+ acres of specialty crops annually. We are closely tied with multiple end-user markets. We work hard to make these connections benefit you and your farm directly.

STI offers flexible contracting options that help you get the most out of your crop.

## Crops

At STI our vision is to form strategic alliances with the top genetic companies for all specialty crops. STI is committed to bringing to the farm the most diverse specialty crop varieties in the industry. Our varieties are proven in the market and in your area.

We have teamed up with:

STI has assembled proven varieties for the following:

Alfalfa, Barley, Corn, Chickpeas, Flax, Milo/Sorghum, Pulses, Millet, Safflower, Sunflower, Soybeans, Spring Wheat, HRWW and cover crop mixes.

## Markets

We have close ties with markets both large and small. Your bottom line will benefit from our diverse marketing strategy. Our customers span the domestic and export market in these categories: birdfeed, edible oils, bio-lubricant, bio-fuel, livestock feed and supplements, as well as human consumption.

This means when you contract with us we will find you the best return.

## Contracts

Flexible contracting options put you in the driver's seat.
